

Adopt-a-Lake Data Form * Vermont Loon Conservation Project**

Lake/Pond: _____ Year _____

Observer Name: _____

Town: _____

Nesting / Territorial Loons: Please report your sightings to Eric Hanson about every 2-3 weeks: ehanson@vtcostudies.org (802) 586-8065
and on VT ebird (see instructions on backside)

Summary of Loon Activity (fill in as information becomes available)

- () Breeding pair
- () Territorial pair
- () Resident / visitors (no pair)

Nest type

- () bowl
- () hummock
- () scrape

Nest Topography

- () shoreline
- () marsh
- () island
- () raft

Nest success -

- 1st chick sighting date: _____
- # eggs hatched: ____
- # fledged from terr. (>6 wks of age): ____
- Date of final observation: _____ (after aug. 15)

Nest failure causes, chick loss, and adult mortality

Please fill in data on the adopt-a-lake instructions form.

Data Form Codes

Weather: (1) clear/partly cloudy (2) cloudy (3) light rain (4) rain

Waves: (1) calm (2) ripples (3) chop/swells < 6" (4) white caps

Boating nearby: (1) <100m (2) 100-400m (3) >400m

Response to boat(s): (1) none (2) alert (3) alert-call (4) crouch (5) swim away (6) flush from nest

Nest Codes: (B) nest building, (I) incubating, (H-I) one hatch, still incubating, (FN) fledge from nest, (F) failed, (U) unknown (e.g., possibly off nest, unsure if nesting), re-nest (RN)

More forms and information at Vermont Center for Ecostudies www.vtcostudies.org

Date:							
Start time (use 24 hr time)							
End time							
Survey Effort: complete (C) or partial (P) survey of lake							
Weather (1,2,3,4)							
Waves (1,2,3,4)							
Boating activity (1,2,3)							
Response to boat(s) (1-6)							
# Paired adults (in territorial region) <i>(If not a territory, enter # adults)</i>							
Fill in only if territorial loon(s) present							
# Intruders (interacting with pr.)							
# Off-territory adults							
# Chicks							
# Subadults							
Notes: (put nest codes here)							

Adopt-a-Lake Monitoring Instructions

Vermont Loon Conservation Project (VLCP)

www.vtecostudies.org

VLCP is a program of the Vermont Center for Ecostudies and VT Fish and Wildlife Department

Questions? contact: Eric Hanson, VLCP Coordinator, (802) 586-8065

PO Box 22, Craftsbury, VT 05826

e-mail: ehanson@vtecostudies.org

Instructions:

1) How often to survey and report sightings to Eric Hanson

A) Lakes with breeding and territorial loons:

Pre-hatching: at least once every 2 weeks

Post-hatching: about every 3-4 weeks through August

- *When loons first observed on nest or chicks hatch, call or send note to Eric right away.*

For periodic surveys, often helpful to send note or call after your survey.

IMPORTANT :

B) Lakes with loon activity but no breeding history: at least **3 to 6 surveys**

(e.g., mid-May, mid-June, mid-July or on Loonwatch day 3rd Sat. of July).

2) What to survey

A) Lakes with breeding and territorial loons: You can focus on finding the loon pair.

B) Lakes with loon activity but no breeding history: survey the entire lake before entering

"0" loons. Make comments on partial (p) surveys (e.g., from your cabin or roadside),

3) Submitting Data

A) Fill out this form and send to Eric Hanson at the end of the summer.

B) Use VT ebird to post your results after each survey or every 2 weeks

VT ebird: <http://ebird.org/content/vt>

Go to www.vtecostudies.org to obtain detailed instructions about entering data on VT ebird.

C) For nesting and territorial loons, please forward your results to Eric Hanson, VLCP Coordinator so that he knows which lakes need surveys and which do not. You can forward your ebird entry by "sharing with others" at the end of the data entry.

When to contact the VLCP Coordinator:

- if you cannot visit a breeding lake during your pre-arranged survey schedule (e.g., bi-weekly)

- first detection of nesting, chicks hatched, or possible abandoned nest

Observation etiquette:

- watch from a distance

- do not agitate or disturb the loons

- Do not search actively for the loon nest....knowing the general location is adequate

Abandoned nests / adult and chick mortality

- If you observe a nesting pair off the nest for several days, and there is an unhatched egg still on the nest, call Eric.

We will want to retrieve the egg and store it in a freezer for analysis.

Lake/Pond: _____

Date of nest failure: _____

Cause - write comments to explain

Comments:

Chick Loss / Adult Mortality **Date:** _____

() chick loss OR () adult mortality

Comments:

IMPORTANT

***** VOLUNTEER HOURS FORM - available download at www.vtecostudies.org: Please mail in by August 15th
